Clingendael International Energy Programme

International Cooperation in Times of Global Crisis: Views from G20 countries

Elements for discussion

**Christof van Agt
18-19 October 2012 Moscow**

Multilateral Energy Sector Governance

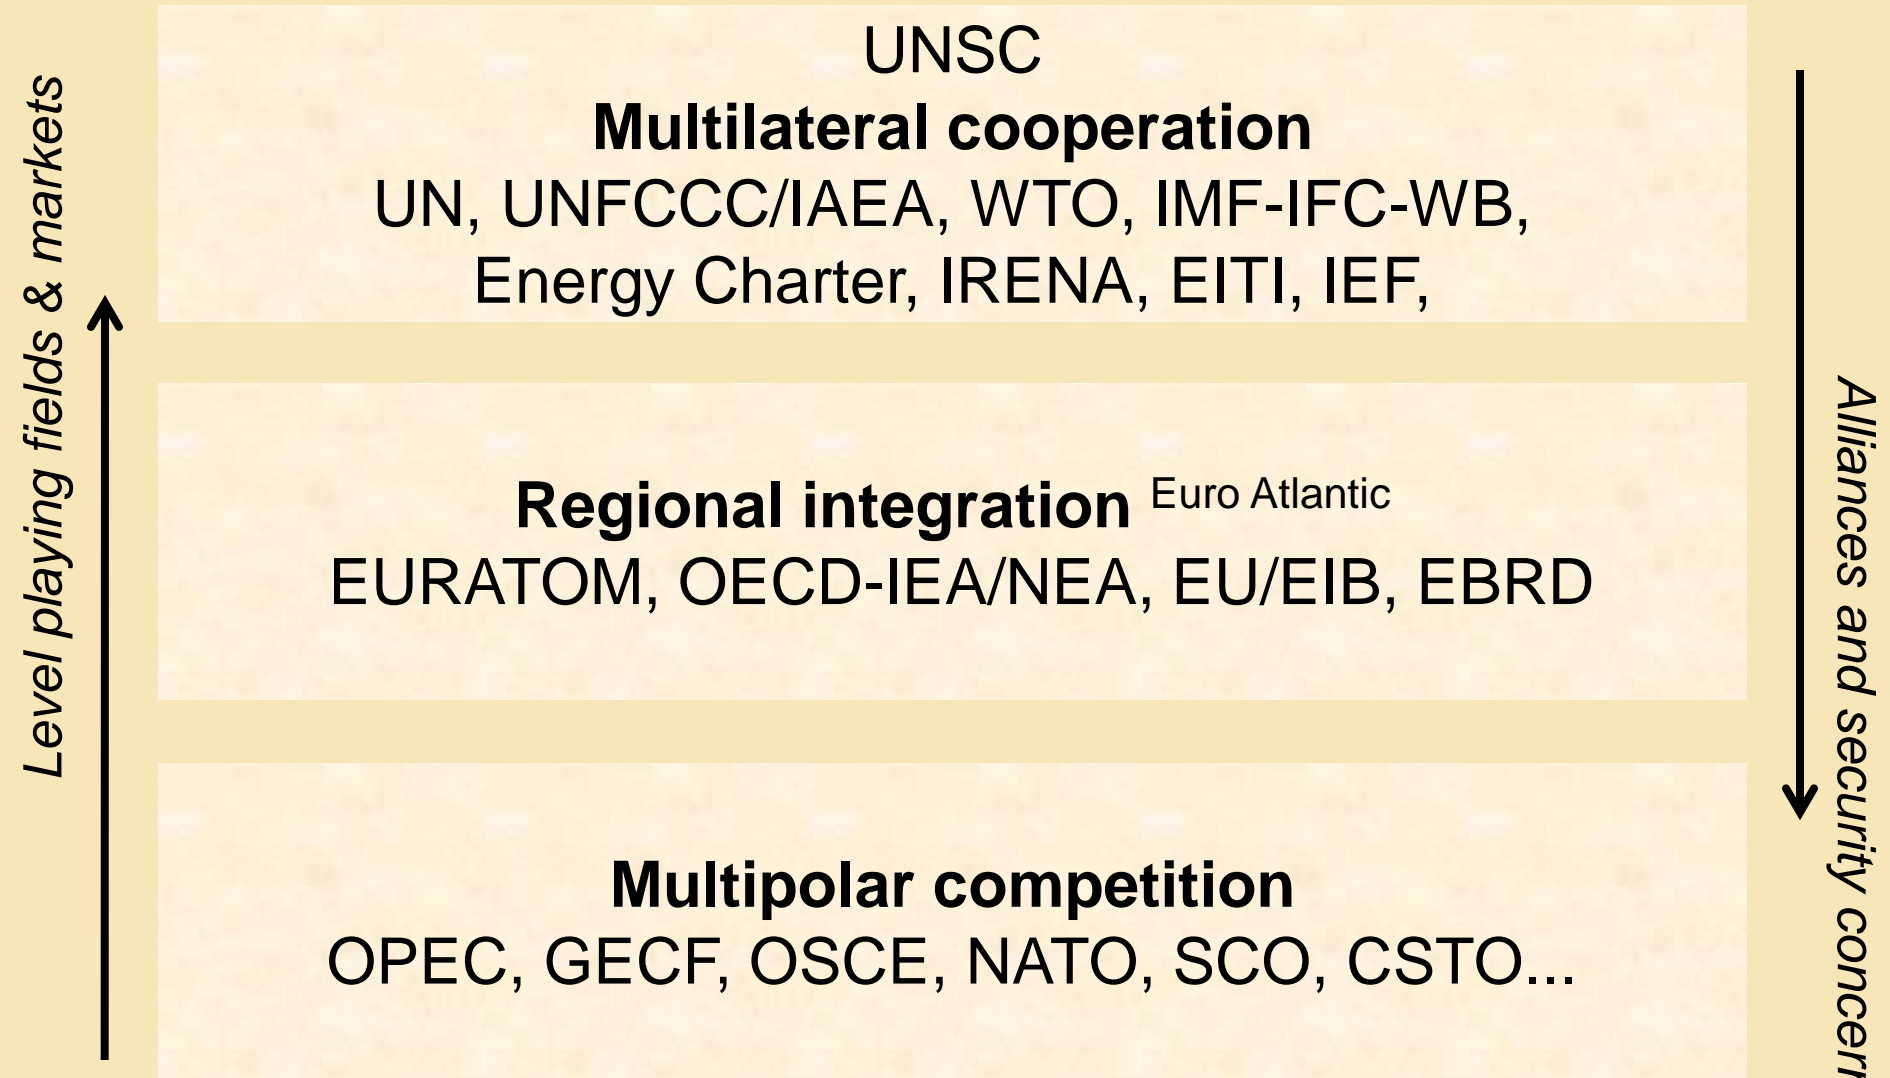

from rule based to principle & fluidity

‘Less binding rules - More shared goals?’

Limits to Multilateral Rule Making in Global Transition

G20 Leads

Key International 'Energy' Governance layers & Institutions

* Modernization key to overcome rigidities and accommodate new realities

G20 Shared goals on energy natural resource and green growth policy

- Market transparency, oversight & parity
- Tolerable uncertainties & disparities
- Balance in fiscal policies; tax and subsidies
- Socioeconomic preferences and impacts
- Green growth and climate policy
- Technology transfer
- Organising principles & compound effects

* Some issues

G20 Shared goals on energy, natural resource and green growth policy

- Draw from Saint Petersburg G8 on Energy Security
 - Reflect issues in shared goals to enhance G20 collective policy cohesion
 - Stabilise policy environment through regular exchange, peer reviews and updates
- * Australian Presidency to take over in 2014?

G20 Compass

Towards a golden age for energy, natural resources & green growth
